

Greenhouse Gas Emissions in 2021

GAC's direct (Scope 1) greenhouse gas emissions are associated with the use of diesel for vehicles, GAC's direct (Scope 1) greenhouse gas emissions are associated with the use of diesel for vehicles, plant, equipment and electrical generation. Scope 1 emissions measured 64,711 tCO₂-eq for the year 2021.

We are not connected to the national electricity grid nor do we contribute to any Scope 2 emissions.

Indirect, Scope 3 emissions are generated from rail transport of ore between the Mine and Port, and business air travel. Scope 3 emissions for the year 2021, measured 8,835 tCO₂-eq.

64,711 Direct (Scope 1) greenhouse gas emissions (tCO₂e)
